# Goal Read Boston City Data – Using AWS to access Boston City Web Server
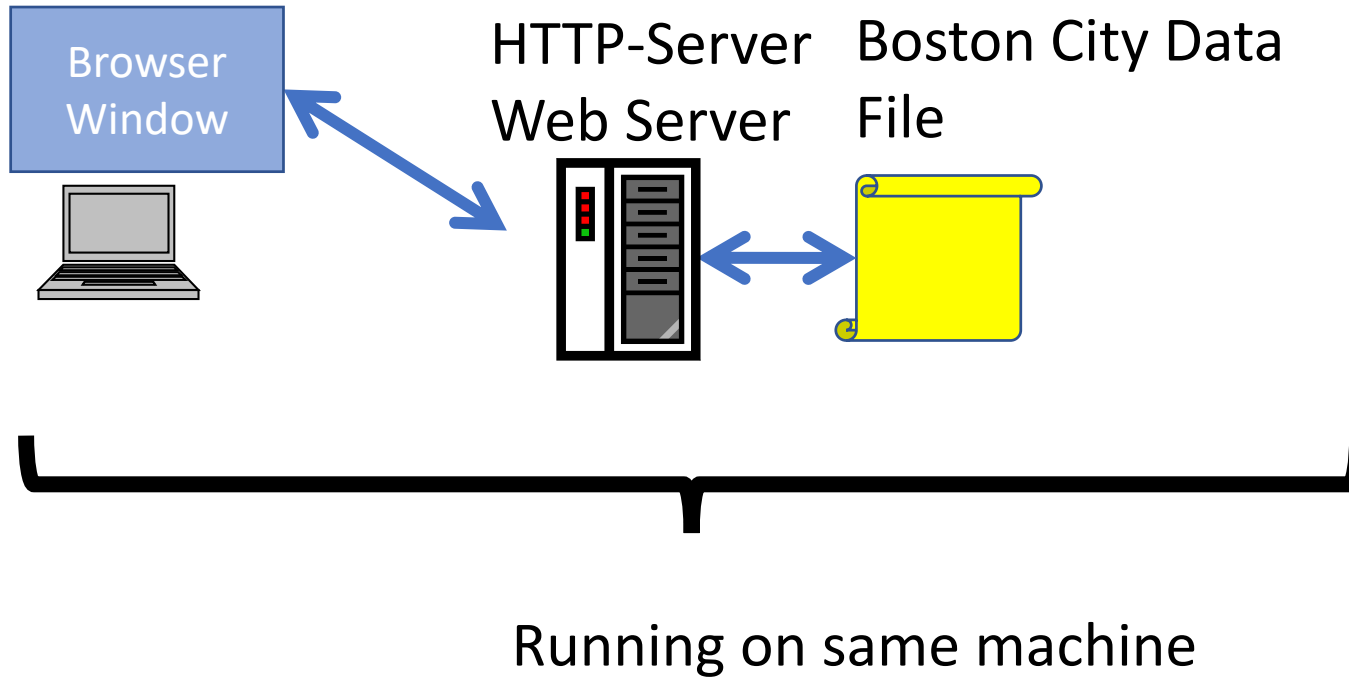

Node/Express
Web Server

Boston City Data
Web Server

Node
Command
Window

Data File

MIT

AWS

Boston
Web
Server

Boston City Data – Debug first on single machine

Node/Express
Web Server

Boston City Data
Web Server

Node
Command
Window

Data File

All running on same machine
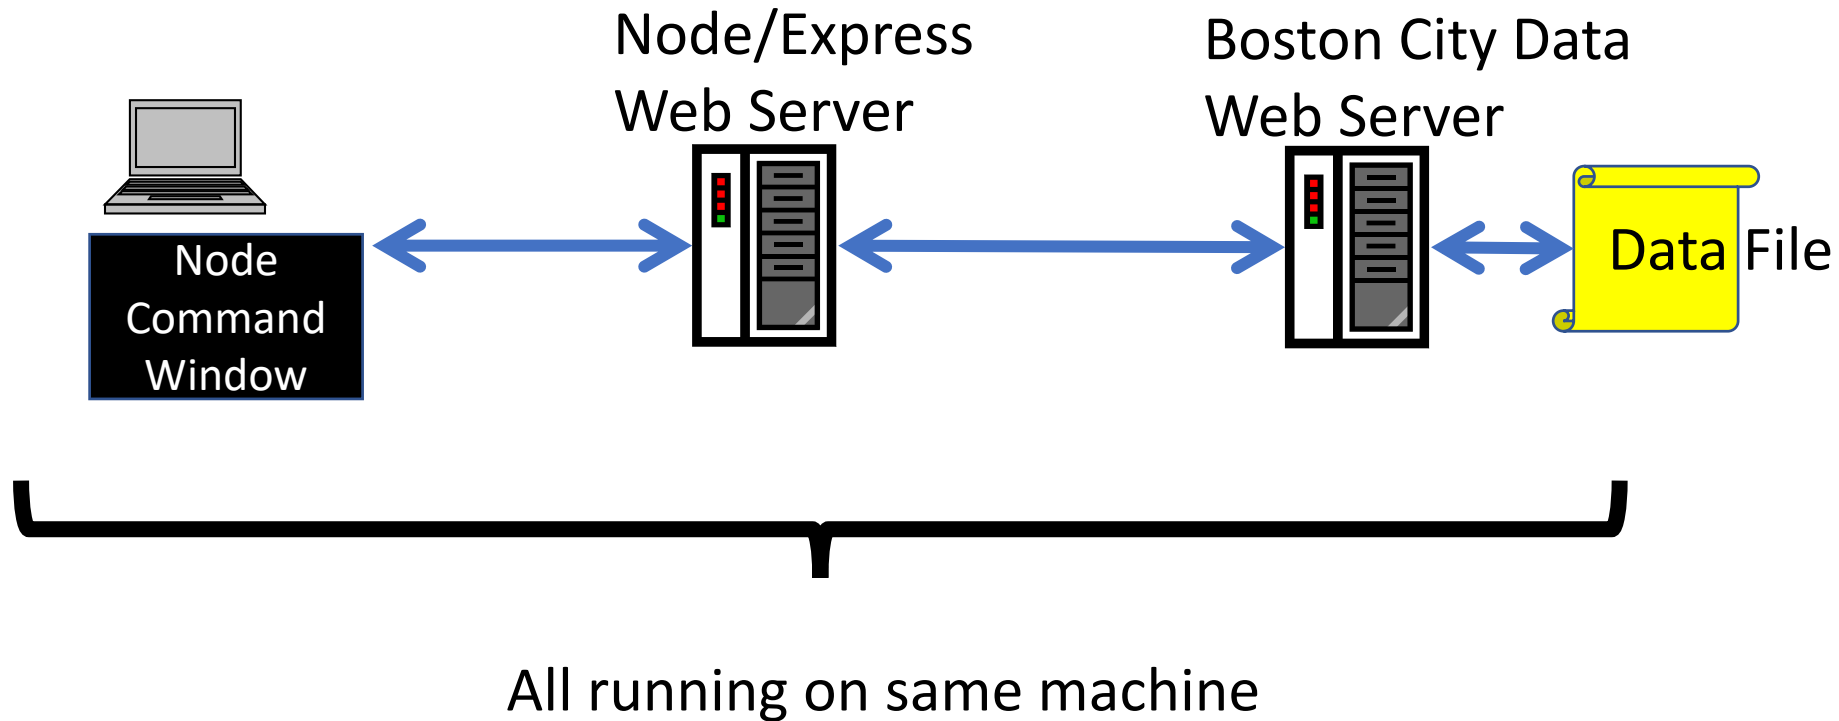

Boston City Data – Node + read.js read local file

Node

Boston City Data File

Node
Command
Window

All on same machine

Boston City Data – Read File via 2 Web Servers

Browser Window

HTTP-Server Web Server

Boston City Data File

Running on same machine

Boston City Data – Read File via 2 Web Servers

Browser Window

Node/Express Web Server

HTTP-Server Web Server

Boston City Data File

All running on same machine
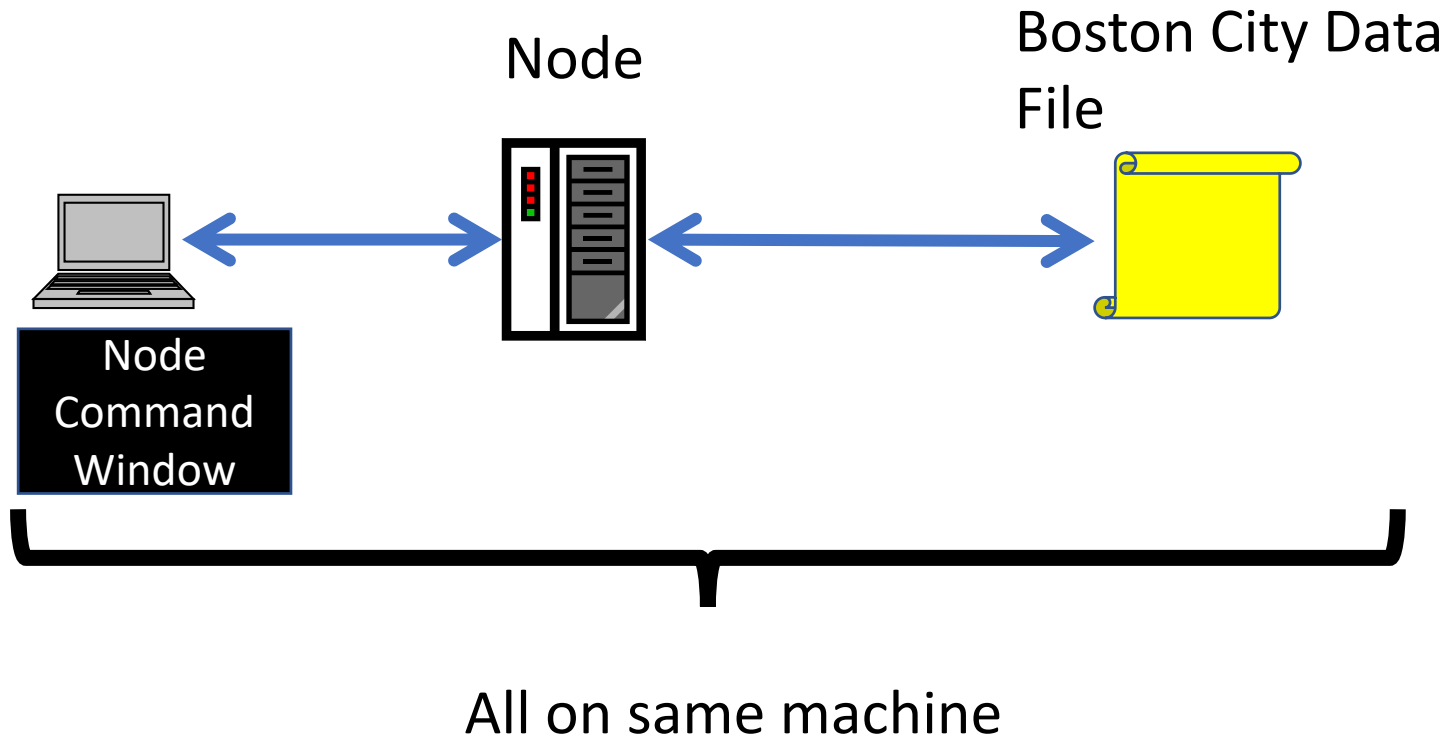

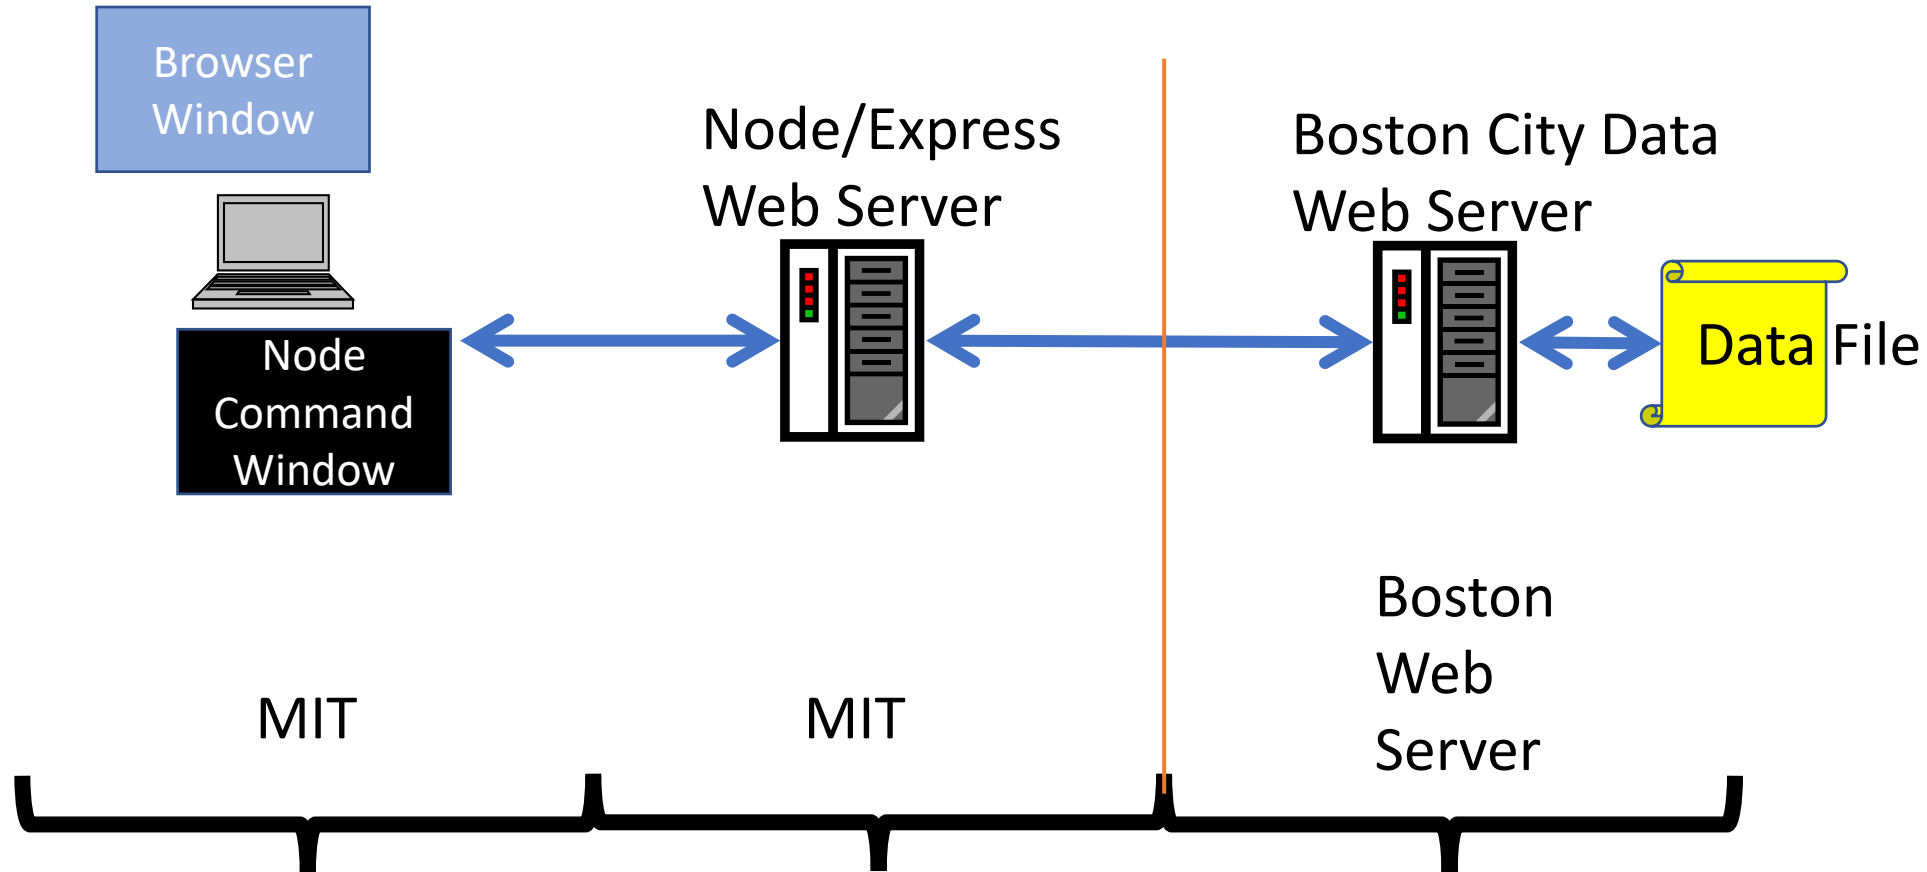

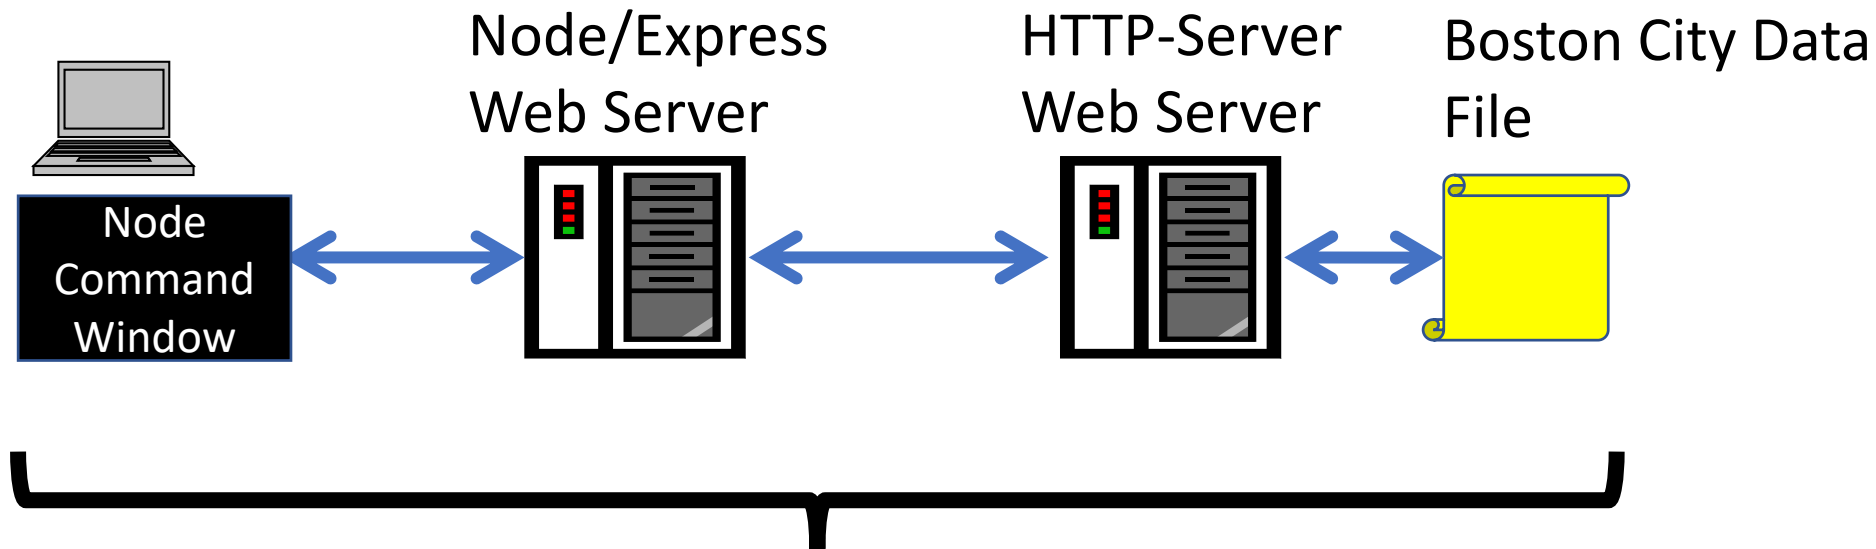

Boston City Data – Read File via 2 Web Servers
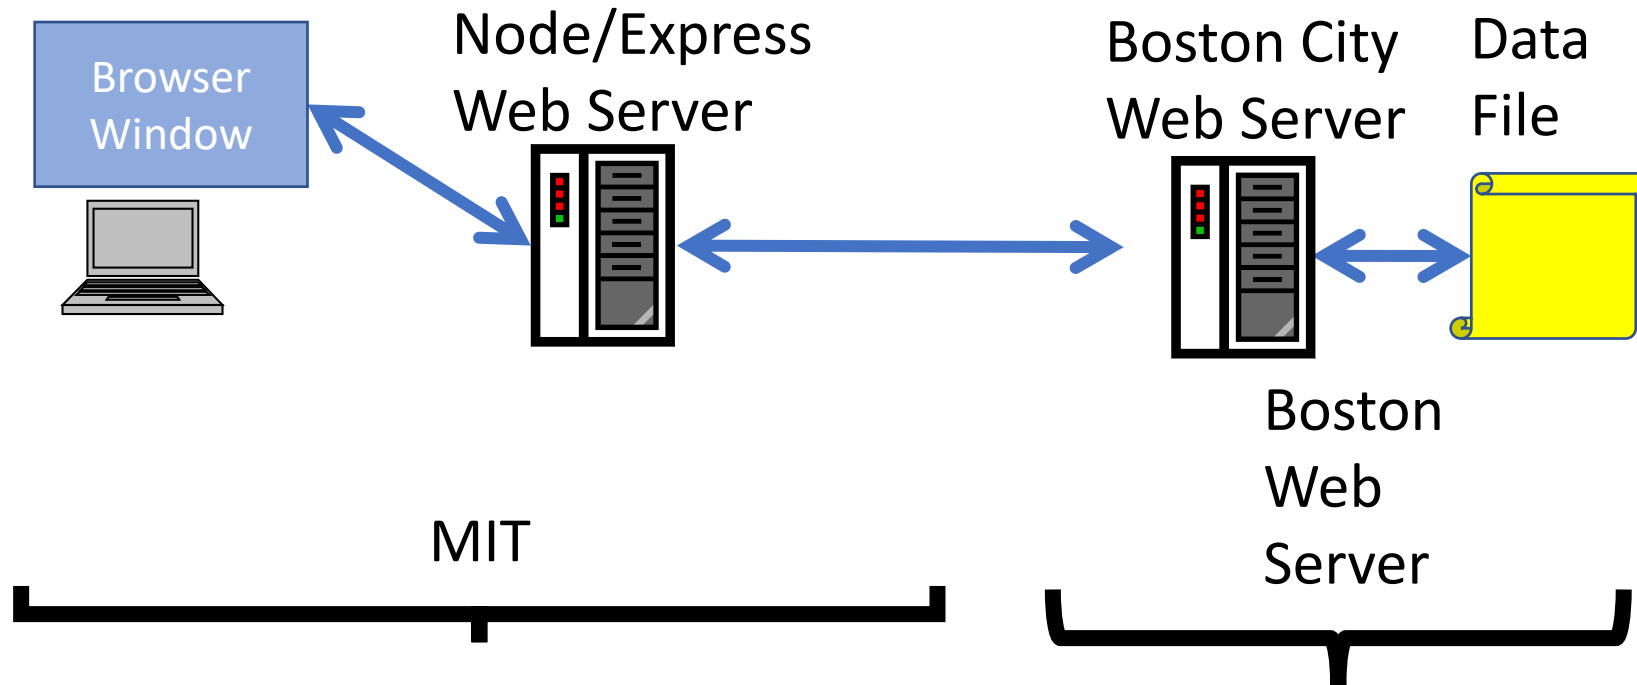

Boston City Data – Using AWS to access Boston City Web Server

Read File Using Node/Express to hit HTTP-Server

Node/Express
Web Server

HTTP-Server
Web Server

Boston City Data
File

Node Command Window

All running on same machine
